Felling Adds I-Series to Their Drop-Deck Line

The I-Series is unique from other Felling Trailer models due to its construction. The I-Series is constructed of a single cold formed I-Beam to make the outer trailer frame from tongue to tail, giving the I-Series a very solid structure. The single frame design also gives the I-Series a very clean and strong profile. Available capacities ranging from 7,480 to 20,000 lbs. and various deck lengths.

Standard Features:

- I-Beam Main Frame & Jr. I Beam Crossmembers
- Approx. Deck Height – 20” – 24.5” loaded (varies by model)
- Dexter Nev-R-Adjust Brakes
- Lights: DOT approve LED with Sealed Modular Wiring Harness
- 5-year Limited Structural Warranty & 3-year Paint Warranty
