Gas Engine Hydraulic Dump Trailer by Felling Trailers, Inc. Keeps On Running

Felling's Gas Engine Hydraulic Dump Trailer is designed for the consumer who uses their dump trailers non-stop and can't afford the delay a dead battery may cause. The Gas Engine powered dump gives a user unlimited power, so that they can work their dump all day without worrying if the battery will last the day. This feature is great for rental yards. The gas engine will keep the trailer dumping with efficiency and speed day in and day out without the hassle of making sure a battery is fully charged for the next customer. A compact engine powers each Gas Engine Dump Trailer with a hydraulic unit mounted in an enclosure located on the tongue of the trailer. The user can easily start the engine then use the remote to power the hydraulic dump box up/down, completing the job and still ready to move on to the next site and work some more.

Felling Trailers manufactures a broad range of hydraulic dump trailers from the FT-6DT-E with a 6,000 lb GVWR (gross vehicle weight rating) to the FT-30-2 DT deck-over dump with either a Contractor's Body or the Utility/Grain Body having a 40,000 lb. GVWR. Felling Trailer's also offers a multitude of options to customize a trailer to the consumer's exact needs.

- more -

Felling Trailers, Inc. started as a small shop in 1974 and has grown to a factory and office complex that today covers over 125,000 square feet. Felling Trailers currently manufactures 3,000 plus trailers a year and is in the process of adding new technologies to increase production along with expanding the manufacturing plant.

The current capabilities of Felling Trailers allows them to provide a high quality product that is distributed across North America and internationally. For more information you can visit them on the web at www.felling.com or call 1-800-245-2809 to speak to one of their highly trained sales representatives.
