Some models may be shown with optional equipment.

FELLING® GENERATOR/COMPRESSOR TRAILERS

FELLING Trailers offers *Custom Engineered Designs*, using only the latest and most innovative design technologies at hand. Our drafting/engineering department can develop a design specifically for your generator or compressor. **FELLING** Trailers will take your envisioned trailer from concept to a tangible reality. There is no detail too small, whether it be a frame trailer with exact bolt spacing to ensure proper placement of a generator/compressor or a more detailed trailer with a single or double walled fuel tank, additional stabilizer legs, a lockable cable box, etc trailer, we will take you from the drafting room to the finished trailer.

Standard features of the fuel tank include;

- mechanical fuel level gauge
- fill supply, return, vent and drain.

Trailer and fuel tank weights must be calculated into the trailer's GVWR.

FT-14-2 GEN

FT-20-2 GEN with optional aluminum fenders and open deck design that allows for a wide variety of mounting configurations

FT-30-3 GEN

FT-30-3 GEN shown to the left with an optional lockable cable box and 400 gal. double walled fuel tank

Shown below is a FT-80-2 MX with optional aluminum toolboxes. Custom mounting of Generator, Fuel Tank and Dehydrator System.

Some models may be shown with optional equipment.
