## Utility Pan Tilt Trailer Operation

### Utility Pan Tilt Trailer Operation

- 1.) The Utility Tilt trailer operates on a pivot point tilt system. To lower the trailer bed to the ground, unlatch the bed by depressing the bracket and lifting the lever. After lifting the lever, the bottom bracket will detach.
- 2.) Manually apply weight to the back of the trailer until it reaches the ground.
- 3.) Load equipment onto trailer. As the equipment moves onto the trailer bed, the trailer will raise up into transport position. When the trailer is empty, manually raise the trailer bed to transport position by walking from the back to the front of the trailer bed.
- 4.) Once the trailer bed is in the upright/transport position, secure the latch and secure any equipment to the trailer bed.
